EXPERIENCE

Happenstance (YC W24)

Software Engineer Intern

May 2025 - Present

Remote - San Francisco

- Developed a browser extension that extracted 20 million linkedin and twitter connections to date, engineering it's architecture for fault tolerance and multi day operations
- Optimized for production by integrating session replay, trace monitoring, a logging system and remote config

Software Engineer

Crypto Algo trading Startup

Dec 2024 - Feb 2025

Remote

- Developed worlds fastest twitter scraper to notify about anyone's activity with 200ms maximum latency, allowing for real time trading data extraction

Software Engineer Intern

CRA

May 2024 - Aug 2024

Ottawa, ON

- Modernized the tax portals of 4.5 million Canadian Businesses by developing full stack registration portals and forms in Typescript and Angular

Software Engineer Intern

The Hive

May 2023 - Aug 2023

Montreal, QC

- Developed an on-demand automation browser with Javascript, SQLite and Playwright that keeps sessions alive 24/7, circumventing login necessity and reducing average automation time

EXTRACURRICULAR

Avionics Team Lead, University Rocketry Team

github.com/CarletonURocketry

Sept 2024 – Present

- Engineered a control system in C for a hybrid rocket engine consisting of a pad server with 18 sensors and 10 valve solenoids, a remote control client and a telemetry system over multicast to allow anyone to access the data
- Developed drivers and patches for the NuttX RTOS to support our operations both with and without hardware

PROJECTS

Short Videos Blocker

github.com/bskdany/StopBeingCooked

Jan 2025 - May 2025

- Developed a VPN server that blocks short form video content by performing frequency analysis on network packets using Python with a 80% accuracy based on data from 100 users

Artificial life simulation

github.com/bskdany/ParticleSimulator

Jan 2024 - Mar 2024

- Engineered a simulator modeling artificial life using Java, achieving 1,100+ downloads and 50k concurrent particles

TECHNICAL SKILLS

Programming Languages: Typescript, C, Python, Java, Go

Frameworks and Libraries: React, Svelte, Angular, ExpressJS, Flask, Playwright

Infra: Linux, Google Cloud, VPS, Docker, PostgreSQL, SQLite

EDUCATION

Bachelor of Computer Science

Carleton University - Second Year Standing

Sep 2023 – Apr 2027

Ottawa, ON

- Dean's List 2023-2024

EXTRA

Cansbridge Scholar W25, Socratica Host @Ottawa, 8 Hackathons attended 3 won
