EXPERIENCE

Happenstance - YC W24

May 2025 - Sep 2025

Software Engineer Intern

Remote

- Developed systems to export users connections into Happenstance's vector db, totaling **50 million entries** to date with support for several platforms such as Twitter, LinkedIn and Gmail

Crypto Startup - Stealth

Dec 2024 - Feb 2025

Software Engineer - Contractor

Remote

- Developed **worlds fastest twitter bot** to notify about anyone's activity with 200ms maximum latency, allowing near real time trading alpha generation

CRA

May 2024 - Aug 2024

Software Engineer Intern

Ottawa, ON

- Modernized the tax portals of 4.5 million Canadian businesses by developing full stack registration portals and forms in Typescript and Angular

The Hive

May 2023 - Aug 2023

Software Engineer - Contactor

Montreal, QC

- Developed a Browserbase alternative with Javascript, SQLite and Playwright that keeps sessions alive 24/7, circumventing login necessity and reducing automation setup by 500ms on average

EXTRACURRICULAR

Avionics Team Lead - University Rocketry Team

Sept 2024 – Present

cuinspace.ca

- Led a team of **10 people** in the development of **3 software and hardware projects** for the national and international high powered rocketry competitions
- Created drivers and patches for the Apache NuttX RTOS Kernel in C to enable support for new sensors, improving performance and fixing Kernel bugs

Rocket Engine Control System

Oct 2024

github.com/CarletonURocketry/hysim

- Engineered a competition compliant control system for a **15 feet tall rocket** for Launch Canada 2025, winning the "Loudest Engine" award, **the only team in Canada** to successfully launch an student designed hybrid rocket

Flight Computer

github.com/CarletonURocketry/inspace-nxtelem

- Developed subsystems for 2 flight computes, successfully recording and transmitting telemetry during the entirety of the flight, then visualizing the data on a ground station

Motorized Radio Tracker

github.com/CarletonURocketry/radio-tracker

- Improved the radio telemetry bandwidth from 1hz to 10hz by developing a motorized radio antenna tracker to follow the rocket during the entirety of the flight within a 15 degree accuracy

TECHNICAL SKILLS

Programming Languages: C, Python, Typescript, Java

Frameworks and Libraries: React, Svelte, Angular, ExpressJS, Flask, Playwright

Infra: Linux, Google Cloud, VPS, Docker, PostgreSQL, SQLite

EDUCATION

Bachelor of Computer Science

Sep 2023 – Apr 2027

Carleton University - Third Year Standing

Ottawa, ON

EXTRA

Neo Scholar Finalist 2025, Cansbridge Scholar W25, Socratica Host @Ottawa, 8 hackathons attended 3 won
